

This corrugated plastic material is made using an extruded polypropylene sheet and is lightweight and cost-effective.

### Specifications:

- Lightweight, stain resistant and weatherproof
- Single or double-sided printing
- Works well with step-stakes and grommets

### Sheet Size & Thickness:

- Available in 4mm, 6mm, 8mm and 10mm
- Up to 5 ft. x 10 ft.

### Typical Applications:

- Indoor or outdoor signage
- Real estate signs
- A-frame sign Inserts
- Construction signs
- Kiosks and Menu Boards
- POP displays
- Counter displays
- Trade show signage
- Directional signs
- Wall and decorative signs
- Exhibition signs

### Specifications:

- Thin, lightweight and weather resistant
- Single or double-sided printing
- Flexible and rollable
- Waterproof and UV Safe

### Sheet Size & Thickness:

- Available in 20pt, 40pt and 60pt
- Up to 5 ft. x 10 ft.

### Typical Applications:

- Indoor or outdoor signage
- Free-standing displays
- Temporary signage
- POP displays
- Trade show exhibits
- Billboards

## Styrene

This rigid substrate is essentially a thin PVC sheet that can be used indoors or outdoors for inexpensive sign solutions.

### Specifications:

- Durable, easy to clean
- Thin, anti-glare, and weather resistant
- Single or double-sided printing
- Dent and scratch resistance

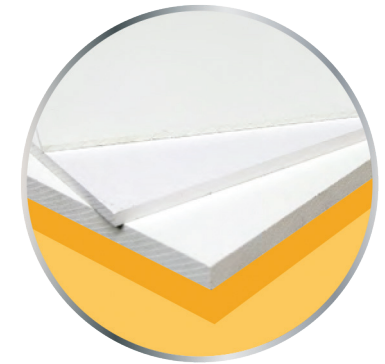

### Sheet Size & Thickness:

- Available in 3mm
- Up to 5 ft. x 10 ft.

### Typical Applications:

- A-frame Sign Inserts
- Construction Signs
- Kiosks and Menu Boards
- POP displays
- Counter displays
- Hanging signs
- Indoor or outdoor signage
- Trade show signage
- Directional signage
- Post and Panel Inserts
- Wall and decorative signs
- Convention signs
- Billboards

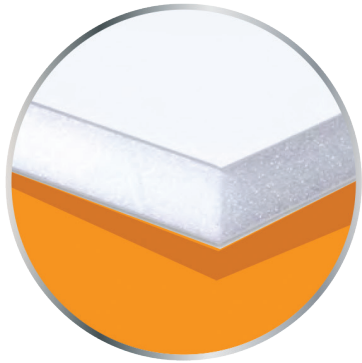

## PVC - SINTRA®

This rigid substrate is essentially a thin PVC sheet that can be used indoors or outdoors for inexpensive sign solutions.

## Foam Board

Foam board (also known as foam core) is an excellent option for creating super-light-weight indoor signs.

### Specifications:

- Durable, easy to clean
- Thin, anti-glare, and weather resistant
- Single or double-sided printing
- Dent and scratch resistance

### Sheet Size & Thickness:

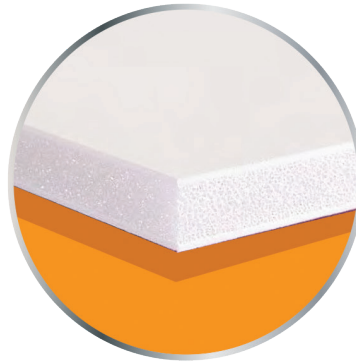

- Available in 3mm
- Up to 5 ft. x 10 ft.

### Typical Applications:

- A-frame Sign Inserts
- Construction Signs
- Kiosks and Menu Boards
- POP displays
- Hanging signs
- Indoor signage
- Trade show signage
- Directional signage
- Presentation Boards
- Wall and decorative signs

## Gator Board

Gatorform board has a reinforced heavy-duty surface that won't dent board. This extruded polystyrene foam board bonded between two layers of wood-fibre veneer offers a rigid, yet lightweight signage solution.

### Specifications:

- Heavy duty, yet versatile
- Anti-glare, and weather resistant
- Single or double-sided printing

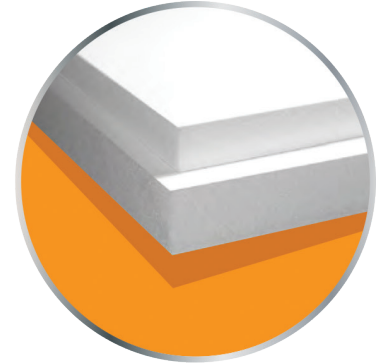

### Sheet Size & Thickness:

- Available in 3/16" and 1/2"
- Up to 4 ft. x 8 ft.

### Typical Applications:

- Kiosks
- POP displays
- Counter displays
- Indoor signage
- Trade show signage
- Directional signage
- Presentation boards
- Wall and decorative signs
- Mounting photos and flat artwork

## Ultra Board

Ultra board consists of a polystyrene foam core board between two rigid sheets of polystyrene. Ultra Board is designed for interior use and is favored for its durability.

### Specifications:

- Rigid, lightweight and durable
- Moisture and Weather resistant
- Single or double-sided printing

### Sheet Size & Thickness:

- Available in 3/16" and 1/2"
- Up to 4 ft. x 8 ft.

### Typical Applications:

- Exhibits & kiosks
- Fabrication
- Trade show booths
- Indoor signage

# Display Board

Display boards offer a good way to make an impression at a conference, create a sign for an office event or craft a poster for a school project. Sturdy corrugated and foam boards are durable, and models with fold-out easels or tri-fold panels stand on their own.

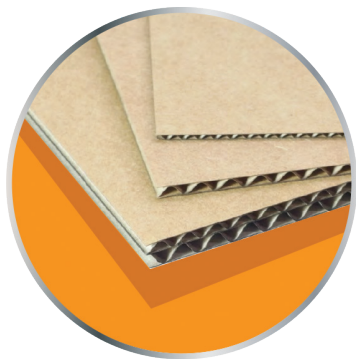

### Specifications:

- Anti-glare, and weather resistant
- Single or double-sided printing

### Sheet Size & Thickness:

- Available in 24pt and 40pt
- Up to 5 ft. x 10 ft.

# E-Flute Corrugated Board

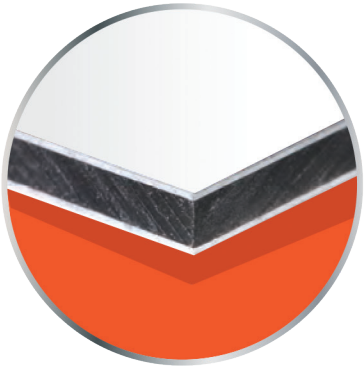

E-flute Corrugated board is a lightweight versatile eco-friendly internal substrate which maintains rigidity whilst offering the flexibility of cutting and creasing. This material offers a good surface for print, is relatively strong and is suitable for direct litho printing, thus creating an excellent retail packaging material.

## Alupanel

Alupanel (also known as Dibond) is a high-end material, composed of aluminum and polyethene making it lighter than aluminium, but very rigid and highly durable.

### Specifications:

- Durable, easy to clean
- Thin, anti-glare, and weather resistant
- Single or double-sided printing
- Dent and scratch resistance

### Sheet Size & Thickness:

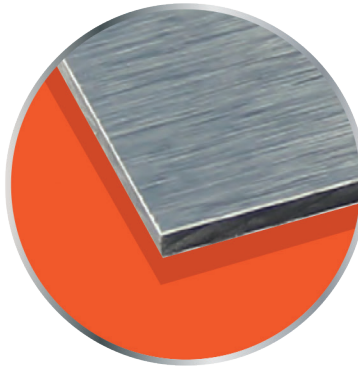

- Available in 3mm & 6mm
- Up to 5 ft. x 10 ft.

### Typical Applications:

- A-frame Sign Inserts
- Construction Signs
- Kiosks and Menu Boards
- POP displays
- Hanging signs
- Indoor or outdoor signage
- Trade show signage

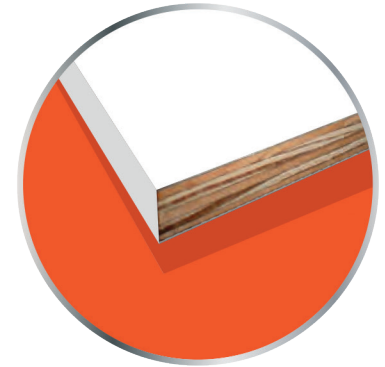

## Brush Aluminum

Brushed aluminum consists of E-panels - two thin aluminum sheets with a reinforced plastic core. Signs are not printed white and have the metallic look that one would envision for aluminum signs. It is proven to be a versatile and affordable signage option for a wide variety of businesses.

## Crezon Board

Crezon is an premium grade plywood, specially treated and prepared for the sign industry. It's very durable making it a great choice for all large outdoor advertising.

### Specifications:

- Heavy duty plywood
- Durable and weather-resistant
- Single or double-sided printing

### Sheet Size & Thickness:

- Available in 12mm
- Up to 5 ft. x 10 ft.

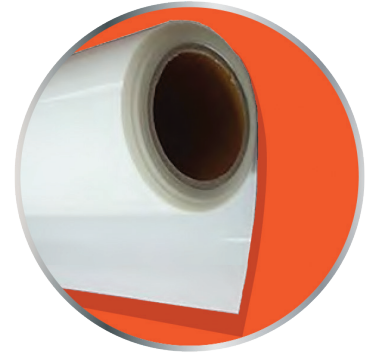

### Typical Applications:

- Construction signs
- Commercial real estate signs
- Trade show signage
- Billboards

## BackLit

Backlit film is the medium of choice for light boxes or any application that you'd like to light from behind. Suitable for both indoor and outdoor application.

**Specifications:**

- Single sided printing
- 7 mil Premium backlit film

## Light Box

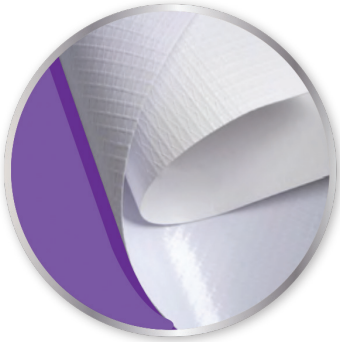

Light boxes add a high-end look to your storefront display! This style of frame typically features a lighting source on the back panel and works well in dimly lit areas.

**Specifications:**

- Advertising and directions
- Convenience store
- Transportation
- Restaurants
- Retail

## Vinyl Banner

Vinyl Banners are very popular and can be used outdoor or indoor advertising. They offer a stylish and portable way to communicate your message at events and shows.

### Specifications:

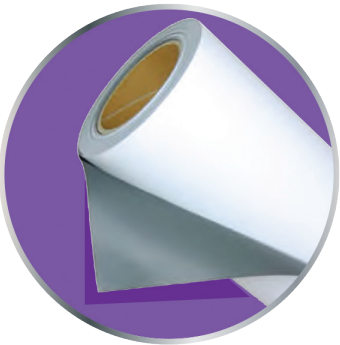

- Very durable and weather resistant
- Vertical or horizontal layouts in multiple sizes
- Matte or glossy option
- Single sided printing
- Banner stand and case available
- Available in 13oz, 15oz & 18oz

### Typical Applications:

- Indoor and outdoor events
- Conferences and exhibitions
- Trade shows
- Real estate
- Retail

## Roll-up Banner

Be ready for all kinds of events with roll-up banners. These lightweight, portable signs are simple to pack and move. Setup is so quick that you're always prepared.

### Specifications:

- Durable and weather resistant
- Full colour printing
- Lightweight and portable
- Anti-Curl vinyl
- Single sided printing
- Banner stand and case available
- Available in 13oz vinyl

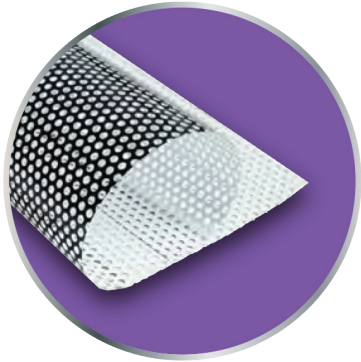

### Typical Applications:

- Indoor events
- Conferences and exhibitions
- Trade shows
- Real estate
- Retail

## Mesh Vinyl

Mesh vinyl is a terrific option for retail storefronts or any other window application! Perforated Vinyl is an great alternative to adhesive vinyl because it provides a one-way visibility to the audience.

### Specifications:

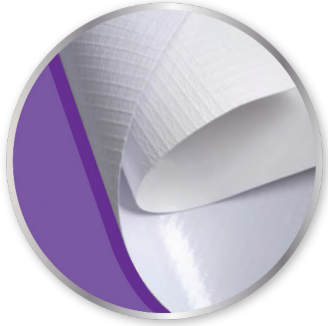

- Very durable and weather resistant
- Vertical or horizontal layouts in multiple sizes
- Matte or glossy option
- Single sided printing
- Banner stand and case available
- Available in 13oz

### Typical Applications:

- Indoor and outdoor events
- Conferences and exhibitions
- Trade shows
- Real estate
- Retail

## Clear and White Vinyl

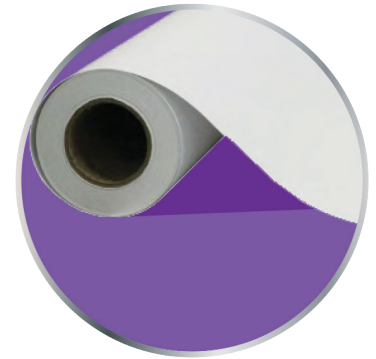

White Vinyl is recommended for outdoor and indoor uses where a high quality marking film with flexibility, durability and resistance to sunlight is required.

Clear Vinyl is transparent, making it perfect for taking advantage of the background surface.

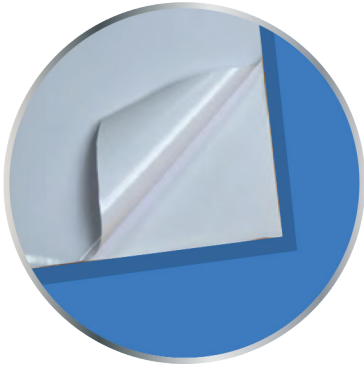

## Low Tack Wall Vinyl

Low tack, removable pressure-sensitive adhesive bonds well to smooth non-tinted glass surfaces while removing cleanly. Adhesive adheres well to an exterior glass surface over a wide range of temperatures.

## Adhesive Vinyl

Adhesive vinyl is essentially bumper sticker material in large size. It has a vinyl face and an adhesive back covered with a release paper.

### Specifications:

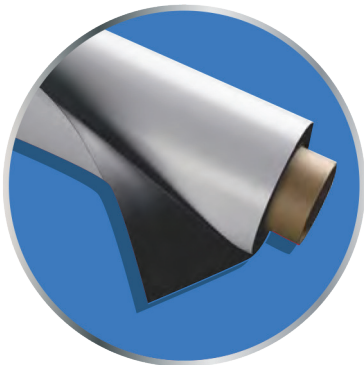

- White or grey back
- Gloss or matte surface
- Single sided printing

### Typical Applications:

- Retail storefronts
- Transportation
- Windows

## Car Magnets

Whether your customer is a real estate agent, restaurant owner or contractor, you can help them make an impression with our premium quality car magnets.

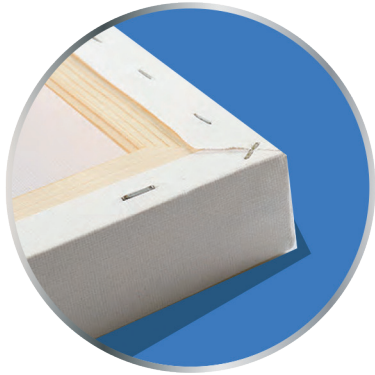

### Specifications:

- Fade-resistant, wind-tested and durable
- Easy to apply, remove and re-apply
- Multiple sizes for cars, trucks and vans

## Canvas

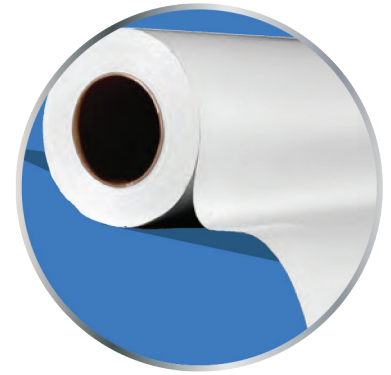

Create eye-catching personalized art by printing your favourite photos or graphics on quality canvas prints. Perfect for your home or office, this custom wall décor is a beautiful way to display and enjoy your treasured photos every day. If you want to give your print the true look and feel of canvas, have it printed on our 17 mil White Canvas.

**Single sided, full color printing:**

- Multiple size options available
- 17mil artist canvas
- 9oz cotton base

## Posters

Heavyweight coated canvas with a prominent tooth. Strong, yet flexible material has a uniform matte finish with a specialized coating that allows for vibrant, photorealistic printing.

**Specifications:**

- C2S Canvas
- Single-sided

# Acrylic

Acrylic is clear, professional high gloss material. Transform your artwork into stunning masterpieces with our premium polished acrylic. The combination of super-vivid printing, professional-quality materials, and the depth and details of your design creates an astonishing effect.

## Specifications:

- Single sided, full colour printing
- Produces luminous colors and fascinating depth
- Gallery-level look and durability
- Available in 1/2" thickness
- Up to 4 ft. x 8 ft.

## Floor Graphics

Floor graphics are popular self-adhesive decals that can feature text, logo, image or pattern. Easy removability makes them a great solution for temporary installations, and are durable enough to stand up to dirt, dust and friction.

Whether you require effective wayfinding signage for your office or you're searching for a unique idea for your next marketing campaign, floor decals are an easy way to stand out and impress.

### Specifications:

- Easy installation & removal
- Print on demand
- Slip-resistant
- Temporary & permanent solutions available

### Typical Applications:

- Branding
- Wayfinding
- Marketing
- Events

# Flags

Flags are excellent for outdoor windy areas as they get more attention than regular banners. We have a variety of options for different surface types.

## Specifications:

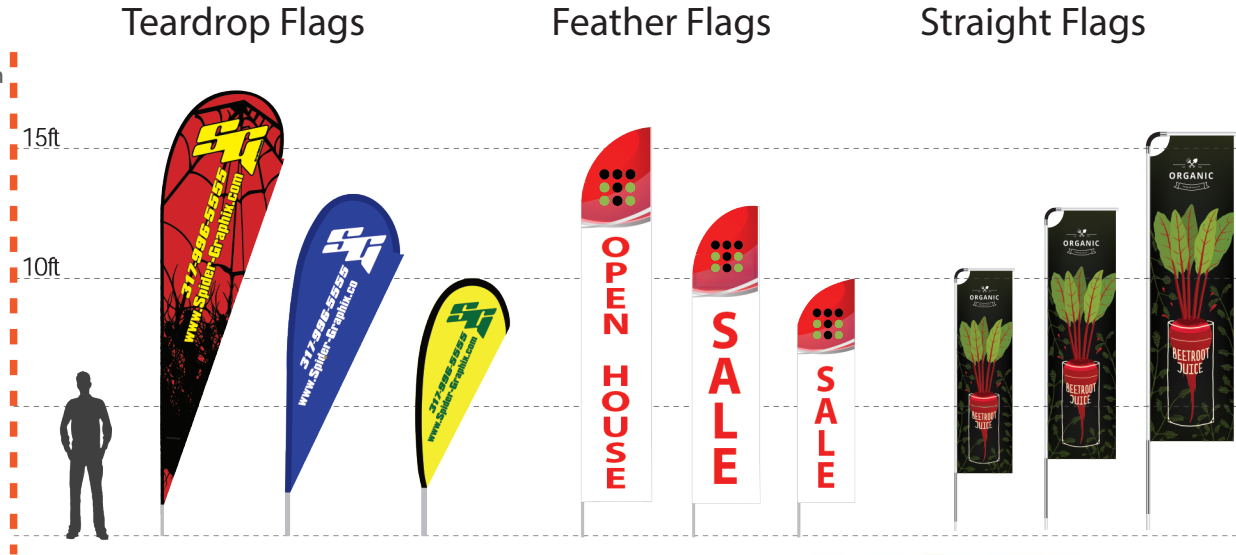

- One-sided or two-sided
- Teardrop, feather and straight shapes available
- Full-color printing on scratch resistant material

## Size:

- Small (9'-10')
- Medium (11'-12')
- Large (14'-15')

## Typical Applications:

- Real estate
- Exhibitions
- Trade shows
- Conferences
- Retail

# Tents

Tents are a great place to bring your audience together to deliver a strong promotional message at exhibitions. Suitable for exterior or interior use, tents provide shelter from the elements and an eye-catching venue for your business.

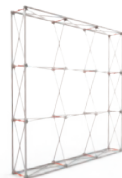

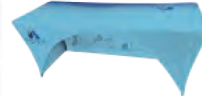

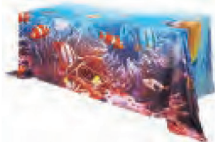

# Table Throw | Exhibition Display | Hanging Banner

Set the foundation for an attention-grabbing trade show booth with customized table covers and throws. Custom table covers and throws spread over folding tables at events and open houses to set the stage for successful connections with visitors

# Finishing

## Contour Cut

Contour cut offers custom-shaped sign production as long as a die line is provided. We provide contour cutting options for Coroplast, PVC and Sintra.

## Velcro

Velcro one-wrap self-gripping straps have polyethylene hooks on one side and nylon loops on the other, which allow the strap to adhere to itself.

## Liquid Laminate, Laminate & Mounting

Liquid laminate, also known as UV coating, is an excellent way to add durability and visual impact to your printed materials. This coating protects from moisture, dirt, fingerprints, and sun exposure while providing a unique finish.

To protect signs from bending or wrinkling or to keep it stiff while hanging on the wall, it is necessary to mount on a rigid backing.

## Hem, Pole Pocket & Grommet

**Hems** - Looking for a premium finish? Products like banners can be sewed at the edges for a cleaner, polished look.

**Pole pockets** - Wrap around edges to allow pole installation when required.

**Grommets** - Durable and high quality grommets can be added to all kinds of signs and banners.
